

CASE STUDY: OFFLINE/ONLINE DATA ENTRY - AUTO PARTS

COMPANY

Client is a US Based. He has his own database website where we need to collect the data from the given list in Internet and extract to Excel in specified format so that they can upload to their database.

PROJECT

Client Approached E-Datatrasc with the task of collecting the data from the Internet and then extract into Excel with the provided list for his business purpose. The Client invited E-Datatrasc to work on this Project to collect and extract the data in the provided list.

E-Datatrasc Team of 7 Data Operators have successfully working on this Project from past one year. We have deployed a dedicated team with a Team lead for this Project.

THE PROCESS

E-Datatrasc Team will take the provided list from the Client and then using the given data need to search and collect the specified fields provided by the Client in the given Excel list. Once data is collected and updated in Excel then the final QC is done to verify the data in the Excel and then uploaded to the Client.

E-Datatrasc makes weekly deliveries in-time with Quality. We work 1000 entries per day.

RESULTS

Client is Happy with the Quality work done by our Team.
