

CASE STUDY: DATA MINING (Medical Professionals List, Doctors List, Indian Groceries, Ayurveda Hospitals, Yoga Centers etc.)

COMPANY

Client is a US Based. He is a Medical Campaign Professional.

PROJECT

Client Approached E-Datatranc with the task of collecting the data from the Internet and then extract into Excel with the provided cities list for his business purpose. The Client invited E-Datatranc to work on this Project to search, collect and extract the data in the Excel.

E-Datatranc Team of 5 Data Operators have successfully working on this Project from past 6 months. We have deployed a dedicated team with a Team lead for this Project.

THE PROCESS

E-Datatranc Team will take the provided cities list and then work on to search, collect and extract the required data provided by the Client in Excel. Once data is collected and updated in Excel then the final QC is done to verify the data and then uploaded to the Client.

E-Datatranc makes weekly deliveries in-time with Quality. We work 500 entries per day.

RESULTS

Client is Happy with the Quality work done by our Team.
